- Include relevant & smooth transitions

  Luke, the main character in *Among the Hidden* by Margaret Peterson Haddix, could be described in chapters 1-4 as being **forbidden**. In other words, a 3rd child was illegal. It was the Population Law that banned third children and consequently forced him into a life as a shadow. He now spent his life entirely within the confines of his home. Furthermore, as the woods were cleared by bulldozers and he was “cleared from the family” as an outcast, Luke became more **lonely**. For example, he spent much time alone simply peeking out his attic vent. Also, he wasn’t allowed to dine with the family anymore; rather, he had to eat alone on the steps.
